

STRATEGIC IT

The 3 Questions That Uncover Hidden IT Waste Ask These Before Approving the Next IT Project

Business leaders: Use this worksheet to challenge unclear IT proposals before they eat up more budget without business value.

Ask Your IT Leadership Team:

- 1. What specific business problem is this solution meant to solve—and how will we know if it worked?**
- 2. What breaks—or stalls—if we don't move forward with it?**
- 3. Which business unit requested it, what outcome are they driving—and did you secure final buy-in before bringing it to me?**

**Don't just approve IT spend—demand clarity,
accountability, and results.**
